6.5.4 consolidated report of the Academic Audit

The purpose of academic audit is to encourage the institution to evaluate the quality of educational processes ultimately bringing the improvement in the quality of teaching learning. The academic audit includes participation of the faculty in decision making process and how they can best utilize the infrastructural and other resources to bring the best result. It also includes adherence to rules and regulations of the affiliating university and its appraisal. The academic audit attempts to review take new and better quality initiatives every year. If not only reflects the quality to teachers working in the institution but their efforts to improve the functioning of the institution.

The academic audit is conducted both internally as well as externally. Internally, it is obtained from the performance circulated among its faculty members, and externally it is given to eminent educationists, administrators, principals, members of various governing bodies etc. The suggestions, if any given by them are incorporated promptly.

The sample academic audit performs show no suggestions and they have found the functioning of the institution highly satisfactory.
